WHO WE ARE

Kenyan Software Engineers Building Systems That Run Real Businesses

AguilaNet is a Nairobi-based technology company delivering custom software for businesses across Kenya. We design, build, and operate digital platforms end-to-end — from the first line of code to the systems that run our clients' operations every single day. Our work spans microfinance and lending platforms, mobile applications, USSD services, web systems, data pipelines, bulk messaging, and payment integrations.

We are not a template shop. Two of the companies we build for — Amura Capital and Shark Credit — run their entire lending operations on systems we designed and continue to support. Four mobile applications we developed for the agriculture sector are live on the Google Play Store today, in daily use by farmers and agribusinesses.

Our Mission

To engineer reliable, secure, and scalable digital systems that let businesses operate faster, serve customers better, and grow with confidence.

Our Vision

To be East Africa's most trusted technology partner for financial institutions and businesses seeking practical, home-grown digital solutions.

Our Values

Reliability, integrity, and craftsmanship — built the way we'd want to depend on them ourselves, with honest pricing and round-the-clock support.

WHAT WE DO

Tailored Digital Solutions to Power Your Growth

- **Microfinance & Lending Systems** — Complete loan origination, disbursement, repayment, and reporting platforms for microfinance institutions, currently powering Amura Capital and Shark Credit.
- **Mobile App Development** — Intuitive, cross-platform Android and iOS apps, including four agri-tech apps shipped to the Google Play Store.
- **USSD Applications** — Reliable USSD services that let customers reach your business from any mobile phone, no internet required.
- **Web & Systems Development** — Secure, scalable business websites and internal management systems built around how your organization actually works.
- **Data Warehousing & Pipelines** — Automated data pipelines and warehousing that turn raw data into reporting and decision-making your team can trust.
- **Bulk SMS & Payment Integration** — High-delivery bulk SMS campaigns and secure payment gateway integrations built directly into your business platforms.

PROOF, NOT PROMISES
